

Cloud Services

Cadre knows the capital expenditure needed for securing and managing infrastructure to run warehouse management applications and protect data is significant. Attempting to manage and maintain these systems in-house is a distraction from the core expertise of resident IT teams. We offer simple cloud deployment models with transparent costs. As your needs grow, limitless scalability is available. Our proven onboarding process makes deploying to the cloud quick and easy—workloads can be live in as little as 30 days.

WHY CLOUD SERVICES?

- **No capital expenditure**
- **Tackle end-of-life refresh**
- **Overcome resource challenges**
- **Access capacity**
- **Test new applications**
- **Harness new efficiencies**

CADRE'S CLOUD SERVICES PARTNER:

MERIDIAN IT INC.

- Custom services address specific business requirements
- Experts across a wide range of technologies
- Providing cloud services since 2012
- Global Support Center operates 24/7/365

CLOUD SERVICES

- **INFRASTRUCTURE AS A SERVICE** is private cloud infrastructure built on best-of-breed technology in world-class data centers that run your mission critical applications and services at one affordable price.
- **BACKUP AS A SERVICE** is resilient cloud-based backup service that securely backs up critical data to ensure data protection and provides peace of mind.
- **DISASTER RECOVERY AS A SERVICE** is cost-effective cloud-based recovery service which protects against unexpected system interruptions and recovers mission critical applications, services and data—in 4 or 24 hours guaranteed.
- **HIGH AVAILABILITY AS A SERVICE** is a robust cloud-based data protection and disaster recovery solution that continuously replicates mission critical applications, services and data in real time and eliminates risk associated with a single point of failure.
